We at Garuda are a committed group of senior professionals from reputed Elevator and Escalator industry with an objective to facilitate ease in Mobility.

COMPANY PROFILE

At Garuda we have a rich work experience with a proficient understanding of moving components, having the ability to resolve even the most minuscule issues with our combined expertise par excellence for nearly 50 years. We boast of client satisfaction leading to a result oriented and responsible enterprise.

Our hands on experience both in India and Abroad gives us an edge over our competitors and also allows us to bring you the best of both worlds as with our collaboration with companies like Ziehl Abegg and others.

Having excelled in the Elevator and escalator industry, we carry a passion to achieve perfection with every assignment that is undertaken..

Our team provides practical, efficient and economical space saving solutions for every type of Elevator and escalator requirement. Clients can be assured of our most competent work methodology from the planning, aesthetics to the design stage, in adopting unique concepts throughout the project till the Completion of the Lift.

Our Scope of work

Quality gets a new definition with Garuda Elevators - offering complete solutions related to all kinds of elevators from G+1 to G+ 25 including Turnkey projects for elevator installation to AMC of the systems.

We provide end to end tailor made solutions as per the exact requirement of the Client. We also undertake modernization contracts that literally double the life span of Subject Elevators.

From Home Lifts without a Pit, Senior citizen Lifts, Wheel chair lifts, Special lifts, High speed lifts, Heavy duty lifts, Hospital lifts and Dumbwaiter Elevator are some of the types of elevators that we have successfully installed to date. We offer excellent after Sales Customer support and maintenance across India.

We at Garuda Elevators Believe in our product and service portfolio and adhere to compliance which is as follows:

Technical Specification

ISI4665 Part 2 Section 1&2, 2000

Safety Specification

ISI4665 Part 3 Section 1&1, 2000

ISI4665 Part 4 Section 1-9 2001 or VS5655

Technical Strength and Experience - a Dividend to Business

Garuda elevators is in an advantageous position to share their experience and expertise with discerning customers of your repute. We are committed to managing products and services not only during the life span of the lift but also beyond, by modernizing the Lift using the latest technology whenever warranted thereby protecting the investments of our customers.

We at Garuda Elevators have more than Five decades of experience with a strong installation and service competence for not only Indian markets but also international as mentioned before. We Possess work experience from the most iconic brands in the elevator industry Like **KONE, OTIS, HITACHI, JOHNSON, TOSHIBA, SCHINDLER, FUJITEC, THYSEN KRUPP etc**, therefore assuring of our unmatched capabilities in the installation, service and maintenance of elevators.

Our experts are always available to study the exact need of the customer and suggest the correct configuration of the product, compatible to the profile of the project, enhancing the prestige and popularity of the projects undertaken.

We hope you will certainly provide us with an opportunity to showcase our service and competence.

NOTE: Reputed references of VVIPs/ prominent builders/Colleges/Hospitals>Show Rooms/ Ware Houses/ Architects are the milestone of nearly half a century of our work in the Elevator Industry.

INTRODUCING FOR THE FIRST TIME IN INDIA TUV CERTIFIED HOME LIFT/PIT LESS MACHINE FROM ZIEHL ABEGG

Garuda Elevators established in 2010, Pioneers in Home Lifts and commercial elevators now Powered by Ziehl Abegg Germany offers you a next generation home lift, integrated with IoT Solutions.

Garuda Elevators for the first time in India powered by Ziehl Abegg introduces you "Pit-less" and "Overhead Less" technology, suitable for your home décor. In response to the huge rising demand for home lifts, our R & D Team at Garuda elevators have taken pain staking efforts in judiciously selecting the world leader Ziehl Abegg for the home lift application, adhering strictly to EN 81 norms and satisfying all the home lift parameters.

ZATOP SM132.21/B – HOME LIFT MACHINE

Tiny but strong ZA top machines

- Less space required
- Smallest shaft dimensions
- Smallest shaft heads
- Easier to transport
- Less torque required
- Less energy consumption

- Long life-time expectancy (>15 years)
- Maintenance free (no oil change)
- High running performance
- ACOP & UCMP compliance by TUV Germany
- Low vibration level
- High travel speeds possible
- Runs on single phase 230 V

ZIEGA 100-SHAFTLESS COMPLETE KNOCK DOWN UNIT

Garuda Elevators are fully equipped to offer home lifts as a **COMPLETE KNOCK DOWN UNIT** for shaft less Homes, Bungalows and Villas

without disturbing the architectural aesthetics so as to blend with the design of your home adding Opulence to your home. Our R&D at Garuda Elevators introduces our **MODULAR SHAFT NAMED PHANTOM** which is the ideal solution for shaft less buildings..

- Pre- Fabricated
- Modular design suiting in line with customers specific dimensions
- Versatile Design Options such as Glass
- Cladding or any other optional cladding by the customer.
- Suitable for both indoor and outdoor Installation
- Eco-Friendly and waterproof
- Retro Fitting made very easy in existing buildings without damaging the structure

Reduction of elevator down time and maintenance

As we are all aware that safety is paramount in vertical transportation, our engineers are well trained and equipped to not only attend the down time swiftly but also plan well for arresting the down time which saves huge cost to the companies at peak traffic hours. At Garuda our engineers are enabled with IoT backed solution to attend to breakdown of down time which prevents huge wear and tear of the elevator but also minimizes the cost for the company. unfortunately elevators tend to be overlooked until something goes wrong. One of the most common expensive and irritating problems is vandalism. We at Garuda Elevators ensure that all interiors finishes and fixtures are made from vandal resistant materials. At Garuda every six months we check the average wait times and elevator speed is recorded and monitored with a tool which gives all the data of the running lift, which our engineers have designed as the phantom box. under the maintenance contracts, Garuda offers CPMP(comprehensive planned maintenance program). Since elevators are a major capital investment for builder, we have carefully constructed the maintenance program in keeping with international standards, thereby minimizing operation costs and achieving the performance from the investment made in the elevator system.

LOP / COP

Rich Mix of Special features

- ▲ Auto Rescue Devise with announcement
- ▲ Special display TFT/LCD/LED/Antique/Creative/Dotmatrix
- ▲ Touch button panels/micro push buttons / Round, Square & Oval shapes
- ▲ Antique landing and car button panels or modern LED panels
